SUMMARY

I am a dedicated Computer Science student with a strong foundation in data analytics. My experience includes building predictive models and analyzing business insights. I possess proficient knowledge in Python, SQL, and data visualization tools like Tableau. I am passionate about utilizing technology to solve real-world problems, and I exhibit effective leadership skills through my involvement in extracurricular activities.

SKILLS

Programming Languages Python, SQL

Data Tools Microsoft Excel, Tableau

Libraries Numpy, Pandas, Matplotlib, Seaborn

Databases PostgreSQL

Soft Skills Leadership, Communication, Troubleshooting, Business Requirements

EXPERIENCE

Data Analytics Job Simulation

Deloitte Australia

- Completed a Deloitte job simulation focused on data analysis and forensic technology, applying Statistics and perform ETL-style data preparation.
- Developed an interactive Tableau Desktop dashboard and used Excel to classify data and derive actionable business insights with clear Business Requirements traceability and proactive Troubleshooting of data controls.

PROJECTS

AI-Based Flood Risk Early Warning System (Final Year Project) [Link](#)

Jun '25 — Nov '25

- Role: Model Development.
- Built an AI-based flood prediction model for Mumbai using ensemble learning (RF + XGBoost).
- Achieved 0.83 precision & 0.82 recall in classifying high-risk flood zones.
- Implemented risk-aware Dijkstra routing.
- Developed real-time alert system with automated email notifications.

Vrinda Store Data Analysis [Link](#)

Nov '25

- Created an interactive dashboard to analyze and visualize business insights.
- Identified March as the highest sales month and top-performing states as Maharashtra, Karnataka, Uttar Pradesh, Telangana, and Tamil Nadu.
- Found that ~64% of customers were women and most purchases were made by adults aged 30-50
- Observed that 92% of orders were successfully delivered and most sales came through Amazon, Flipkart, and Myntra.

Retail Sales & Customer Segmentation [Link](#)

Nov '25

- Built interactive dashboards analyzing sales trends, top products/customers, and revenue patterns.
- Performed data cleaning and customer-level feature engineering using Python.
- Applied **K-Means clustering** to segment 4,339 customers by total spend and purchase frequency.
- Created a Tableau **Customer Segmentation Dashboard** with KPIs, cluster profiles, and behavioral insights.
- Identified high-value, loyal, and low-engagement customer groups to support targeted marketing.

EDUCATION

B.Tech in Computer Science And Engineering, GH Rasoni College Of Engineering And Management, Nagpur (GPA: 8.52)

Jan '22 — Present
Nagpur, India

HSC in Class 12th, Arts, Commerce & Science College, Chandrapur (GPA: Percentage: 75.50%)

2022 — Jan '22
Chandrapur, India

CBSE in Class 10th, Montfort Higher Secondary School, Ballarpur (GPA: Percentage: 76.50%)

2020 — Jan '20
Ballarpur, India

ACHIEVEMENTS

PCEMS Conference

VNIT

Nov '25

Presented the paper “An AI-Based Flood Risk Early Warning System for Urban Environments: A Case Study of Mumbai” and received an official certificate of recognition.
